

BATON CARROT

Type WSM

Machine specially developed for cutting elongated products such as:

- Carrots
- Cucumbers
- Parsnips
- Sweets

Description:

This machine consists of a rotating turret wheel and a two cutting sections.

The product is horizontal placed in the wheel, where the top of the product is cut. After that, the product is divided in smaller pieces depending on the size requested.

The smaller pieces are pressed trough a particular stick knife, what makes sticks come out at the front of the machine.

Waste is discharged underneath the machine.

door het stickmes gedrukt, zodat het aan de voorkant in de vorm van kleine sticks de machine kan verlaten.

BATON CARROT

Type Baton Carrot
